Spectra Premium invests in a new stainless steel fuel tank assembly line in Trollhättan, Sweden

BOUCHERVILLE, QC – April 25th 2019 – Spectra Premium Industries announces, via its European subsidiary, TechROi Fuel Systems AB (TFS), an investment in a new OEM stainless steel fuel tank assembly line in Trollhättan, Sweden. This new facility, planned for an October 2019 opening, will involve manufacturing processes at the cutting edge of technology, and its integration with the engineering and fuel testing laboratory activities will foster the future growth of the company in the European market.

“This investment follows our production optimization efforts of OEM fuel tanks destined to the European market following the acquisition of TFS last August,” declared Jacques Mombteau, President and CEO of *Spectra Premium Industries Inc.* “The new Trollhättan site, which will consolidate our design, engineering and production operations at the same location, will improve our competitiveness in the European OEM market.” added Mr. Mombteau.

About Spectra Premium

Spectra Premium Industries, headquartered in Boucherville (Québec), is a North American leader in the design, development and manufacturing of aftermarket parts and components for the cooling, fuel and engine management systems of automotive vehicles and light trucks. The company is a leader in the engineering and development of parts and components for motor vehicles and light trucks, notably for the fuel delivery systems of plug-in hybrid vehicles, for vehicle manufacturers (OEMs). Furthermore, the company also designs and manufactures tooling in that segment.

The company has operations in Canada, the United States, Europe and Asia, and distributes its products in the United States, Canada, Mexico and international markets.
